

**International Workshop on Security and Safety in
Network & Information System**

Call for Papers

As part of

**2013 International Conference on Computational Intelligence
and Security (CIS' 2013)**

December 14-15, E'mei Mountain, Sichuan, China

<http://www.cis-lab.org/cis2013/>

SCOPE AND OBJECTIVES

With the rapid development of information security, smart system and its applications, it is important to design methods, an apparatus, and a system for enhancing application reliability of a script-based service. The method includes: analyzing data source information of a script-based service; obtaining current state information of the data source of the script-based service according to the analysis result; and judging the availability state of the script-based service according to the obtained current state information. With the technical solution of the present invention, a related analysis function is added to a script-based service server to analyze related data source information in the script-based service logic and mark the script-based service. In this way, a user can know the state of the script-based service when requesting a service, thus avoiding unnecessary service trials, saving system resources, and improving the user experience.

This international workshop aims to identify and explore the different issues and challenges related to system reliability, smart system and application in network & information system. Such as, what are the benefits or inconvenience of mobility on security? What are the appropriate mobility models to have a good level of security? How can we build up trusted platforms and trustworthy systems for wireless and mobile networks? How can we authenticate users in open wireless networks? How can we build up security protocol for resource-limited devices? How can we build up a secure architecture for wireless and mobile networks? In addition, novel ideas and research works from end consumers' perspective, such as privacy, trustworthiness and network survivability, will be embraced by the session.

The Session topics include (but are not limited to) the following:

- Security Issues in Wireless & Mobile Networks
- Key Management in Wireless & Mobile Network
- Secure Multicasting/Broadcasting

- RFID Mutual Authentication
- Public-Key Crypto Algorithm
- Secret Sharing Scheme
- Security in Sensor Networks
- New Ideas about Information security, Smart System and Network security
- System reliability and application
- Software system reliability and safety
- Safety-critical system and its application
- Intelligent information processing
- Intelligent transportation system

PAPER SUBMISSIONS

You are invited to submit original and unpublished research works on above and other topics related to heterogeneous network and multimedia contents protection. Submitted papers must not have been published or simultaneously submitted elsewhere. Submission should include a cover page with authors' names, affiliation addresses, fax numbers, phone numbers, and email addresses. Please, indicate clearly the corresponding author and include up to 6 keywords from the above list of topics and an abstract of no more than 400 words. Authors should use the Latex style files or MS-Word templates to format their papers. The length of a submitted paper should not exceed 5 pages in two-column format. Please include page numbers on all submissions to make it easier for reviewers to provide helpful comments. Papers will be accepted only by electronic submission via email to the international workshop organizers at heixinhong@xaut.edu.cn.

Each paper will receive a minimum of three reviews. Papers will be selected based on their originality, relevance, technical clarity and presentation. Authors of accepted papers must guarantee that their papers will be registered and presented at the international workshop. Accepted papers will be published in the conference proceedings which will be made available at the time of the meeting.

Submission of a paper implies that should the paper be accepted, at least one of the authors will register for the CIS conference and present the paper in the session. Accepted papers will be given guidelines in preparing and submitting the final manuscript(s) together with the notification of acceptance.

All papers accepted for international workshop will be included in the Conference Proceedings published by the CPS, which will be submitted for possible indexing by EI and ISTP.

Submission

The manuscript should be formatted according to the Latex style file or MS-Word template provided by CIS 2013 main conference, and is compliant to the requirements of CIS main conference: <http://www.cis-lab.org/cis2013/>

The formatted paper should be submitted via CIS'13 online paper submission system: http://www.cis-lab.org/cis2013/index.php?Paper_Submission

Important Dates

Paper Submission Due Date: July 15, 2013

Notification of Paper Acceptance: August 15, 2013

Camera-Ready Paper Submission Due Date: August 30, 2013, 2013

Session date: December 14-15

Session Organizer(s):

- ◆ **Chair:** Dr. Xinhong Hei, ADD: P.O. Box666, Xi'an University of Technology, Xi'an 710048, P. R. China. Email: heixinhng@xaut.edu.cn.
School of Computer Science and Engineering, Xi'an University of Technology, Xi'an, P. R. China.

- ◆ **Co-Chair:** Dr. Qingqi Pei, ADD: P.O. Box338, Xidian University, Xi'an 710071, P. R. China. Email: qqpei@mail.xidian.edu.cn.
State Key Laboratory of Integrated Service Network , Xidian University, Xi'an 710071, P. R. China

- ◆ **Co-Chair:** Dr. Yulong Shen, ADD: P.O. Box338, Xidian University, Xi'an 710071, P. R. China. Email: ylshen@mail.xidian.edu.cn.
State Key Laboratory of Integrated Service Network , Xidian University, Xi'an 710071, P. R. China

If you have any question, please do not hesitate to contact with us.
